

# "DIVISION" PROVES FROST

## Los Angeles Convention Is Very Poorly Attended

No Definite Action Taken on Proposal to Urge Formation of a New State.

### MANY SOCIETIES NOT REPRESENTED

Committee Appointed to Gather Information on Secession Question to Be Reported at Future Time.

LOS ANGELES, Oct. 5.—The "Los Angeles State division" convention, called as a result of the mass-meeting in this city on September 13th, last, was held in the assembly room of the Chamber of Commerce tonight, and after two and a half hours of discussion of the proposal to divide California into two separate states, voted practically unanimously to defer final action on the subject until December 1st. A resolution was adopted requesting the chairman of the convention, the president of the Los Angeles Chamber of Commerce, Merchants and Manufacturers' Association and the Municipal League, to select five other representative citizens of Los Angeles, three of whom are to be attorneys, to secure all information bearing upon the proposition, determining its feasibility and desirability, and report back to an adjourned session of tonight's convention on December 1st.

There were but forty-one delegates present at tonight's meeting, only about half of whom were from this city. The remainder were from Venice, Santa Monica, Watts and Pomona, representing various commercial organizations of those cities.

The meeting was called to order by Chairman A. J. Welles of Los Angeles, who was made permanent chairman of the convention.

### FAILED TO RESPOND.

Several of the important commercial and civic organizations of this city which were invited to send delegates, did not do so. The Chamber of Commerce was represented only by President Booth, who addressed the meeting, saying that the Chamber had thought it wise not to take any definite action at this time. He said that it was the purpose of the chairman to proceed at once, if the convention did not do so, to secure information bearing upon the question of state division, and to take later whatever action such information justified.

Secretary Edgerton of the Municipal League made a similar statement. The Los Angeles Credit Men's Association and the Los Angeles City Club took no action on the invitation to send delegates to tonight's convention.

Chairman Wallace, in calling the meeting to order, sounded the keynote of the meeting.

"The present movement for state division," he said, "has grown out of the outrageous tax imposed upon Southern California by the State Board of Equalization. But that spirit of state separation has existed for years. Our purpose here tonight is not to take irrational and irrevocable action on the subject. We should be careful, conservative, patient, and use as much wisdom in proceeding as is possible. We are called together merely to consider the desirability of dividing the state. If we are to be successful we must work slowly and not radically at first."

### NOT POPULAR.

U. H. Plummer, representing the Merchants and Manufacturers' Association of Los Angeles, reported that the organization which he represented had taken a poll of its members on the subject with the result that out of a total of over 700, but 248 had voted. Of this number 204 had voted in favor of state division, 132 against and 12 were non-committal.

The two speeches were made by delegates urging immediate and radical action. A motion was offered pledging the convention to proceed at once towards the calling of another convention of all Southern California cities and counties to take action under the Pico law of 1859, and immediately petition congress for separate statehood. The motion offered by T. E. Gilman, proprietor of the Los Angeles Herald, to appoint a committee to secure all available data on the subject and determine the feasibility of separate statehood was adopted as a substitute. Gilman's address vigorously urging action looking towards ultimate state division was heartily cheered.

### BOOKMAKERS ARRAIGNED.

NEW YORK, Oct. 5.—The thirty alleged bookmakers, the four private detectives, John O. Connelley and the Brooklyn Jockey Club, as corporations, who were all indicted for alleged violations of the anti-betting law, were arraigned in the county court at Brooklyn today and pleaded not guilty. Judge Dicke fixed bail at \$3,000 in each case and set October 2 for trial for the defendants.

# IMPERIAL VALLEY DECIDES TO BOYCOTT ALL SAN FRANCISCO

IMPERIAL, Cal., Oct. 5.—The Imperial Board of Trade tonight passed a resolution declaring that no business man of the valley would patronize any San Francisco hotel or house because of articles published in newspapers of that city stating that lives and property in this valley are in immediate danger of destruction by overflowing of the Colorado river. No such condition exists, but telegrams have been pouring into the valley from friends of residents imploring them to flee for their lives.

# CRUISERS SAIL FOR PHILIPPINES

## Honolulu Brewery Violates Law, to Detriment of Conduct of Sailors of Fleet.

HONOLULU, Oct. 5.—The armed cruisers of the Pacific fleet, headed by the Tennessee, flagship of Rear Admiral Schrevel, started this afternoon on their cruise to the Philippines. The steamer, belonging to the Hawaiian fleet, has been left behind and it is believed that several gunboats were aboard the steamer. The Hawaiian fleet sailed today for San Francisco. A wireless message has been sent to the Hawaiian fleet ordering them to deliver to the naval authorities at that city.

Several of the departing officers, in interviews published here, say that the men made a record for good conduct while in Hawaii. Although no less than 3,000 sailors and marines were given shore leave during the month's stay of the fleet, the only unpleasant incident that occurred was on Sunday, September 26, when a local brewery sold great quantities of beer in violation of municipal regulations and the men are not held responsible for disturbances of the day.

# NO MORE DISPLAYS FOR WILBUR WRIGHT

## Aviator Will Do a Purely Commercial Business Hereafter With His Aeroplanes.

NEW YORK, Oct. 5.—Unless some change of heart shall alter a decision announced today by Wilbur Wright, the spectacular flight made here yesterday by the Dayton aviator is the last which he or his brother will make in public.

"I regret," said Wright, "we shall devote all our efforts to the commercial exploitation of our machines and only fly as a matter of experiment to test the value of whatever changes we decide to make in their construction."

Mr. Wright added that neither he nor his brother wished to be looked upon as showmen and that all efforts for exhibition purposes would be rejected.

"The flight of yesterday," said he, "was more than an exhibition. It was more like the taking up of a challenge or the making of a record to stand as a milestone in the history of aviation. I would have done better than I did had not the blowing out of a cylinder of my machine prevented me from making a second flight. All things considered I am satisfied with my performance of the morning."

# ALDRICH EXPLAINS TARIFF TO FRENCH

## Business Opinion at Paris Is Calmed Regarding Operation of the New Law.

PARIS, Oct. 5.—A more optimistic feeling prevails in government circles regarding the inevitable adjustment of France-American tariff relations under the new law as a result of the explanations made by Senator Aldrich of Rhode Island during his talk last night with a number of the French ministers and other high officials.

Aldrich dissipated the minds of the Frenchmen of the idea, entertained here, that the termination of the existing commercial agreement between France and the United States months in advance of the agreement with other countries, notably Germany, was in any way intended as a discrimination against France; and more important, Senator Aldrich relieved the anxiety in Paris concerning the information of certain French officials that the French government had refused to accept the American maximum tariff. France afforded every minimum and every administrative concession to her tariff.

As some of the concessions had been made after hard fought battles with other countries in return for specific advantages, the government in spite of its desire to avoid a tariff war, was hostile to the granting of wholesale concessions.

It is understood that Senator Aldrich expressed the opinion that certain measure of latitude and that, if France afforded the minimum rate on articles in which the United States was principally interested, Mr. Taft would probably consider that America was not unduly discriminated against within the meaning of the act.

# STATE GRANGE OPENS SESSION

PETALUMA, Cal., Oct. 5.—The annual session of the State Grange opened here today, although delegates are still registering.

Tonight's session was tendered the visiting delegates by the patrons of husbandry of Sonoma county and addresses were delivered by W. W. Griffith, master of the State Grange; E. B. Pettit, overseer of the State Grange, and many others.

During the session Professor Leroy Anderson of the State Farm at Davis, will be in attendance and will speak on the benefits of the farm.

# THIRTY LIVES LOST IN MINE

## More Than Fifty Men Entombed in Coal Shaft Near Nanaimo, British Columbia

# GAS EXPLOSION WAS TERRIFIC

## Rescuers Are Badly Handicapped—Fire Is Now Burning in Two Levels—Eight Bodies Recovered.

NANAIMO, B. C., Oct. 5.—Thirty lives are known to have been lost in an explosion which entombed more than fifty men in the No. 2 Extension mine of the Wellington Colliery Company near here this morning. Twenty-five of the imprisoned men were rescued, but the rapidly spreading fire prevented the rescuers from completing their work. Eight bodies have been recovered by early evening and the workers are bending every effort to force further entrance into the mine to save any who may be living and to recover the bodies of the dead before they are consumed by the fire which is spreading rapidly.

Those found following T. Thomas, J. Molheux, Andrew Moffatt, A. Montague, Thomas O'Connell, W. Davidson, E. Dunn, one unidentified man.

The work of rescue is still continuing, but it is not expected that any more bodies will be recovered before morning, as the portion of the mine where the explosion occurred is badly wrecked, the brattice being torn down and rescuing being very badly handicapped by gas. The majority of the men killed are old residents of the district and well known.

The accident happened at 9 o'clock this morning. The force of the explosion was terrific, blowing out stoppings and unhinging doors. The first effects were confined to the slope in which it occurred, but later the fire spread and is now burning in two levels.

Rescuers hurried to the mine from the neighboring towns of Nanaimo and Ladysmith. While hundreds of men are available for rescue work, conditions in the mine are such that not more than fifty men can enter the mine at any one time and the others being compelled to stand idly by and watch the attempts of their companions to force an entrance into the straits where the miners are entombed.

All the men rescued so far are badly injured.

The men employed in the collieries of Vancouver Island are of the better class of British miners, are well paid and have comfortable homes. The Wellington Colliery Company, which owns the Extension mine, is controlled by British Columbia capitalists. Lieutenant Governor James Dunsmuir being at the head of the corporation.

# CHINESE POTENTATE DIES AT PEKING

## Chang Chih Tung, One of Imperial Triumvirate, Was an Enemy to Foreign Influence.

PEKING, Oct. 5.—Chang Chih Tung, grand commander of China, died at 9:45 o'clock last night.

Chang Chih Tung, who was one of the three members of the Grand Council of China, had been in the government service virtually all his life. He was formerly viceroy of Shaan-Si and was made a grand marshal in 1905.

He was director general of the Hankow-Soochow railroad and took a prominent part in the negotiations concerning the loan to China by foreign interests of \$20,000,000 for the construction of that line. His anti-foreign tendencies appeared during these negotiations.

An unsuccessful attempt was made to assassinate Chang Chih Tung last May and in July of this year he was stricken with paralysis.

# BIG MINING SUIT IS COMPROMISED

## COUNCIL BLUFFS, Iowa, Oct. 5.—The million-dollar Doyle-Burns mining suit, which has been in the courts of this state for several years, has been settled in the District Court at Council Bluffs, Iowa. The case was to have come up again next week, a stipulation was filed today, signed by attorneys from Council Bluffs and Denver, representing the plaintiffs. Each side is to pay its share of the costs in the case, which amounted to many thousands of dollars. The terms of the settlement are not divulged in the stipulation.

# PROF. STRINGHAM DIES AT BERKELEY

## Was Acting Head of State University and a Noted Authority on Mathematics

OAKLAND, Oct. 5.—Professor Irving Stringham, head of the department of mathematics at the University of California for the past twenty-seven years and acting head of the university during the absence in Germany of President Wheeler, and who was to have received President Taft on his behalf, died this morning at Berkeley.

He is survived by a widow, Martha Day Stringham, and three children, Harriet Day Stringham, Martha Stringham, and Roland Irving Stringham, by a sister, Mrs. A. E. Sexton, of Tupelo, Kansas, and a nephew, E. H. Stringham, city attorney of Berkeley.

The funeral will be held Thursday afternoon.

Professor Stringham was born December 10, 1847. He was graduated from Harvard University in 1877 and took a post graduate course at Johns Hopkins University, where he remained until 1882. In that year he was elected to the head of the department of mathematics in the University of California in which capacity he served to the time of his death. Professor Stringham was a member of the American Mathematical Society, of which he was at one time an officer. He contributed freely during his life to various mathematical journals and has written several books on mathematical subjects which are in general use in the high schools of the state.

# TOLSTOY ILL AGAIN.

ST. PETERSBURG, Oct. 5.—The health of Count Leo Tolstoy is again declining. He has been at the sanatorium after his return to Yasnaya Polyana from his trip to Moscow. He is unable to get out of bed and is unable to undertake a short promenade.

# UNKNOWN FOOTPAD KILLS A POLICEMAN IN SALT LAKE ALLEY

SALT LAKE CITY, Oct. 5.—Special Policeman C. C. Riley was shot and almost instantly killed by an unidentified man tonight in an alley at the rear of the police station. Riley and Patrolman Chase had been detailed to investigate the report of a hold-up in the alley and they left the station at once, taking different routes.

Before Chase had proceeded far into the dark passage he heard two shots and a moment later saw a man dash into the street at the far end of the alleyway. Chase found Riley gasping for breath and unconscious. The wounded man died a few minutes later.

Following the shooting Patrolman Chase made a statement at headquarters but was unable to throw any light on the affair. He declared that the unknown assassin evidently had been surprised by Riley and to escape arrested shot the policeman down.

# THREE EARTHQUAKES FELT IN SALT LAKE

SALT LAKE CITY, Oct. 5.—Three sharp and distinct earthquakes were felt here tonight. The first occurred at 7:42 and the last at 7:47. All three were felt at points in Idaho.

The earthquake which occurred today from the government observatory here. The exact time of the disturbance is given as 7:40 p. m.

The movement extended throughout Cache valley in Northern Utah, and said to "have been" particularly severe at Logan. From Halibourg and Malad, towns in Southern Idaho, come reports of three distinct shocks within a period of two minutes.

# CAPITALISTS TO FIGHT TAX

## War Declared on Levy on Corporations at Convention of Street Car Makers

DENVER, Colo., Oct. 5.—Active opposition to the corporate tax proposed by President Taft here less than two weeks ago, was launched today at the opening business session of the American Street and Interurban Railway Manufacturers' Association.

President James F. Shaw of Boston ranged himself with the opponents of the corporation tax and declared that the case would be carried to the courts for a decision on the constitutionality of the law. He held that the tax imposed an additional burden upon the holders of corporation stock while it does not affect the income of bondholders.

Shaw advocates the proposed amendment to the constitution giving congress the power to levy a tax on income, as a matter of emergency, holding it as more just and more likely to reach possessors of large incomes, while not materially affecting others. Present sentiment indicates the adoption of resolutions setting forth the association's opposition to the corporation tax.

Shaw's address also emphasizes the magnitude of the industry represented in the present congress when it includes 226 companies in the United States, \$2,000,000,000 of single track railway, 1,000,000,000 of gross annual income, 10,000,000,000 of standing par value of stocks and bonds \$4,000,000,000.

Among the important departmental meetings today were those of the engineers and electricians. The latter agents discussed the problem of procuring witnesses to accidents and the relation of companies to the press in case of accidents.

# BIG FIGHT IS ON FOR TIDE LANDS

## Suit in Los Angeles Superior Court Is Between State and the Railroad Company

LOS ANGELES, Oct. 5.—The first one of a dozen suits to determine the ownership of the land at San Pedro and Wilmington valued at many thousands of dollars, was begun before Judge Walter Bondell in the Superior Court here today. The claimants are the State of California, the Southern Pacific company and the bonding interests, which are partly involved in the Wilmington Transportation company.

With J. A. Anderson of this city appearing for the Southern Pacific company and the bonding interests have a large array of attorneys to represent them.

As stated by Attorney Anderson in court today, the actions are to quiet title lands held on state patents, and grants of the surveyor general. The state is contesting the validity of the titles on the grounds that the tide lands cannot be sold by the state, that tide lands belong within two miles of an incorporated city cannot be sold and that lands between the high tide mark and in navigable water cannot be sold.

The proceedings today were limited to attempts by the state's attorneys to show that the location of these lands is within the prescribed boundaries and below high tide. In the suit begun today there are 18,000 acres.

That the suits are to be vigorously contested was indicated by the great mass of preliminary moves in the shape of demurrers and legal objections which already have been made.

# WU TING FANG MAKES AN INEFFECTIVE PLEA

WASHINGTON, Oct. 5.—Dr. Wu Ting Fang, the Chinese minister, made an ineffectual appeal today to the Department of Commerce and Labor to prevent the deportation of nine Chinese who will be taken back to China on the steamer Magnolia, which sails from San Francisco today. The nine Chinese came on the Mongolian and were ordered sent back because they have tuberculosis. Eight others who have also that disease had in milder form, were allowed to remain.

# DEATH FOLLOWS FOOTBALL

POTTSVILLE, Pa., Oct. 5.—Robert Millington, a football player of the local high school team, who was injured in a game at Shamokin Saturday, died today.

# GREAT BANK FOR THE NATION

## Central Financial Institution to Be Proposed to the Next Session of Congress.

# PRESIDENT TAFT FAVORS SCHEME

## Said to Be Basis of Plan to Be Submitted by Monetary Commission of Which Senator Aldrich Is Head.

WASHINGTON, Oct. 5.—The coming Congress must meet a situation born of the panic of 1907 when the issue of clearing house certificates was necessary to supply sufficient currency to meet the demands of the business interests of the country. The temporary legislation enacted during the critical period, either he supplanted or re-enacted into permanent law, it was stated today, and foremost among the various projects standing the proposed national central bank. The common belief is that it will form the basis of the currency legislation to be recommended by the monetary commission, and President Taft in his recent Boston speech signified his own favorable disposition towards the project.

"A bank of the people and for the people," is the denomination of the institution made by George M. Reynolds, president of the American Bankers' association, in his Chicago speech. He pointed out that the people were to be stockholders, for any one would be privileged to buy the bank stock just as he might a share of any other corporation. A small interest on such an investment would be guaranteed by the government. Political control of the great bank would be made difficult by the life appointment of the officers.

It is not intended that the central bank should support the credit of the nation. If it spends more money than it collects by taxation, it must continue to borrow money by the issuance of bonds.

Governmental assistance to the institution would be limited to the deposit with the central bank of all government funds now in the national banks.

The existing banks, it is hoped, would find their compensation for the loss of the funds in being relieved from the present burden of carrying the whole weight of responsibility for increases in the circulating medium and in the fact that the central institution would not receive deposits from individuals.

The question as to how the business man is to be benefited by a central bank is sought to be answered by the statement that the project includes a provision for the acceptance of and discounting of paper as a bank for the issue of money. Such paper would represent actual transactions between solvent concerns and would be sure to redeem whenever the action was concluded.

That this plan will meet with prolonged opposition when laid before Congress cannot be doubted, although the administration desires to have the matter regarded as non-political.

# PRESIDENT TAFT Spends Day At Berkeley, Oakland and San Francisco—Discusses Practical Politics, Coast Needs and Effect of Panama Canal

SAN FRANCISCO, Oct. 4.—After spending the entire forenoon in the cities of Oakland and Berkeley, across the bay, President Taft was welcomed to San Francisco this afternoon by a throng which lined the walks in some places ten deep along a line of march extending over nearly three miles of the principal streets. The school children of this city and Oakland and Berkeley gave their joyous cheers for the President and, as in most of the other cities Mr. Taft has visited on this trip, were one of the prominent features of his reception.

Covering three cities and spending three-quarters of an hour on San Francisco bay, the President had a busy day. As he was crossing from the Oakland mole to San Francisco the army transport Thomas was setting sail for the Philippine Islands and by the President's request the revenue cutter Golden Gate, on which he was a passenger, was drawn up alongside the big vessel, whose sides were lined with soldiers and the families of officers. On the bridge of the transport the Philippine constabulary band, which played at the President's inauguration in Washington, was with him recently at Seattle and was present this morning in the Greek theater at Berkeley when he made an address in that classic amphitheater. The band was up and was playing "Hail to the Chief" as the President shouted across the water to the kiki-chid soldiers:

"Good bye, boys, I wish you a pleasant voyage!"

SOME HOMESICKNESS.

The President never loses an opportunity while on the coast to speak a good word for the Philippines, and he is always sure of a respectful appreciation. Referring to his own experiences at Manila, in one of his addresses today, he said:

"You never can tell what the future is going to bring about. It seemed a long way around to the White House to go out 10,000 miles into the tropics, but that is where it landed me."

San Francisco at a glance the day was one of true sight splendor.

The question as to how the business man is to be benefited by a central bank is sought to be answered by the statement that the project includes a provision for the acceptance of and discounting of paper as a bank for the issue of money. Such paper would represent actual transactions between solvent concerns and would be sure to redeem whenever the action was concluded.

SOME HOMESICKNESS.

The President never loses an opportunity while on the coast to speak a good word for the Philippines, and he is always sure of a respectful appreciation. Referring to his own experiences at Manila, in one of his addresses today, he said:

"You never can tell what the future is going to bring about. It seemed a long way around to the White House to go out 10,000 miles into the tropics, but that is where it landed me."

San Francisco at a glance the day was one of true sight splendor.

The question as to how the business man is to be benefited by a central bank is sought to be answered by the statement that the project includes a provision for the acceptance of and discounting of paper as a bank for the issue of money. Such paper would represent actual transactions between solvent concerns and would be sure to redeem whenever the action was concluded.

That this plan will meet with prolonged opposition when laid before Congress cannot be doubted, although the administration desires to have the matter regarded as non-political.

It is a great pleasure for me to be here and to be received by Professor Moore, my old comrade—I had almost said in arms, but I did not carry muskets in the Philippines—but my old comrade is coming to initiate legislation and to pioneer in the far-distant islands of the Pacific.

"It is a great pleasure to be here in this unique theater and talk to a body of people who represent the high aspirations of a community," said Professor Moore, who has alluded to the fact that we are yearning around to the scientist, whether it be in politics, in agriculture—he did not mention the theories—but it is a fact that the universities of the land are especially such a one as this, placed as centrally and embracing as largely a student body, are coming to figure more and more with their influence upon the science of government and the course of parties.

BUSINESS OF GOVERNMENT.

"The business of government is not an easy one when you are in it. It has a somewhat different aspect when you are engaged in pulling the throttle or putting on the brake, from that which it has when the professor's chair or the editor's garb is worn. There are obstacles and friction and difficulties that it is not possible to explain, but the existence of which those in the midst of them can affirm with great emphasis, and it is those obstacles and difficulties which the statesman of always appreciated by the critics who do not have the responsibilities.

"None the less, the high standard set by these critics is one of the utmost use in lifting up government and lifting up a people. The statesman of the future must be able to rise to the level of the critics for higher things and being compelled either to modify or qualify your ideals in practical results is after all progress.

IS AN OPTIMIST.

"I like to affirm that I am an optimist, and an optimist with respect to popular government. If I were not I should not enjoy being in the business of government, but in that progress we sometimes have to give way in our theories to the views of the general public, and in the votes in Congress and not infrequently years after, we have to admit that on the whole, the result, while reached by reconciling and compromising all the views of differing people is better than if we followed with blind fidelity the theory of any one person.

"Popular government is justified and vindicated on the theory that every class—and by that I mean those who in respect to a community are similarly situated—should be able to take part in the government. If I were not I should not enjoy being in the business of government, but in that progress we sometimes have to give way in our theories to the views of the general public, and in the votes in Congress and not infrequently years after, we have to admit that on the whole, the result, while reached by reconciling and compromising all the views of differing people is better than if we followed with blind fidelity the theory of any one person.

The school children of this city and Oakland and Berkeley gave their joyous cheers for the President and, as in most of the other cities Mr. Taft has visited on this trip, were one of the prominent features of his reception.

Covering three cities and spending three-quarters of an hour on San Francisco bay, the President had a busy day. As he was crossing from the Oakland mole to San Francisco the army transport Thomas was setting sail for the Philippine Islands and by the President's request the revenue cutter Golden Gate, on which he was a passenger, was drawn up alongside the big vessel, whose sides were lined with soldiers and the families of officers. On the bridge of the transport the Philippine constabulary band, which played at the President's inauguration in Washington, was with him recently at Seattle and was present this morning in the Greek theater at Berkeley when he made an address in that classic amphitheater. The band was up and was playing "Hail to the Chief" as the President shouted across the water to the kiki-chid soldiers:

"Good bye, boys, I wish you a pleasant voyage!"

SOME HOMESICKNESS.

The President never loses an opportunity while on the coast to speak a good word for the Philippines, and he is always sure of a respectful appreciation. Referring to his own experiences at Manila, in one of his addresses today, he said:

"You never can tell what the future is going to bring about. It seemed a long way around to the White House to go out 10,000 miles into the tropics, but that is where it landed me."

San Francisco at a glance the day was one of true sight splendor.

The question as to how the business man is to be benefited by a central bank is sought to be answered by the statement that the project includes a provision for the acceptance of and discounting of paper as a bank for the issue of money. Such paper would represent actual transactions between solvent concerns and would be sure to redeem whenever the action was concluded.

That this plan will meet with prolonged opposition when laid before Congress cannot be doubted, although the administration desires to have the matter regarded as non-political.

# PRESIDENT TAFT GUEST OF STATE

## Spends Day At Berkeley, Oakland and San Francisco—Discusses Practical Politics, Coast Needs and Effect of Panama Canal

SAN FRANCISCO, Oct. 4.—After spending the entire forenoon in the cities of Oakland and Berkeley, across the bay, President Taft was welcomed to San Francisco this afternoon by a throng which lined the walks in some places ten deep along a line of march extending over nearly three miles of the principal streets. The school children of this city and Oakland and Berkeley gave their joyous cheers for the President and, as in most of the other cities Mr. Taft has visited on this trip, were one of the prominent features of his reception.

Covering three cities and spending three-quarters of an hour on San Francisco bay, the President had a busy day. As he was crossing from the Oakland mole to San Francisco the army transport Thomas was setting sail for the Philippine Islands and by the President's request the revenue cutter Golden Gate, on which he was a passenger, was drawn up alongside the big vessel, whose sides were lined with soldiers and the families of officers. On the bridge of the transport the Philippine constabulary band, which played at the President's inauguration in Washington, was with him recently at Seattle and was present this morning in the Greek theater at Berkeley when he made an address in that classic amphitheater. The band was up and was playing "Hail to the Chief" as the President shouted across the water to the kiki-chid soldiers:

"Good bye, boys, I wish you a pleasant voyage!"

SOME HOMESICKNESS.

The President never loses an opportunity while on the coast to speak a good word for the Philippines, and he is always sure of a respectful appreciation. Referring to his own experiences at Manila, in one of his addresses today, he said:

"You never can tell what the future is going to bring about. It seemed a long way around to the White House to go out 10,000 miles into the tropics, but that is where it landed me."

San Francisco at a glance the day was one of true sight splendor.

The question as to how the business man is to be benefited by a central bank is sought to be answered by the statement that the project includes a provision for the acceptance of and discounting of paper as a bank for the issue of money. Such paper would represent actual transactions between solvent concerns and would be sure to redeem whenever the action was concluded.

That this plan will meet with prolonged opposition when laid before Congress cannot be doubted, although the administration desires to have the matter regarded as non-political.

# News of Central California Towns

## FARMER FOUND IN ROAD UNCONSCIOUS

Started on Horseback to Lead Two Mules.

Unable to Give Any Account of How He Met With Mishap.

MADERA, Oct. 5.—James Curran, a well known farmer, was found lying in the road about three miles from home yesterday in an unconscious condition. The side of his face was bruised and there was a deep wound in the inner corner of his eye. He was taken to his home, where he regained consciousness. He stated that he had got off his horse to tie the mules he was leading so that he could drive them to his ranch, but could not throw any light on the accident. He is suffering from concussion of the brain and is in a serious condition. Dr. Reid attended him.

Mr. Curran came to town yesterday after two mules. He rode a horse and led the mules. At about 1 o'clock the riderless horse arrived at the ranch and Mr. Curran telephoned to her father, W. Garner, who left town and found Mr. Curran lying on the road east of the Santa Fe track.

The city trustees last night passed an ordinance making it a misdemeanor to ride a bicycle or other vehicle on the sidewalk. Many complaints had reached them of the recklessness of wheel riders who disregarded the ordinance which required them to dismount when approaching a pedestrian.

The board decided to hold a meeting next Wednesday at 10 o'clock a. m., at which time the transfer of the Madera sewer system will be made.

C. C. Ross was given a permit to erect a brick building on D street, 25x90, in which he will conduct a moving picture show.

The money in the county treasury was counted today and found to aggregate \$46,103.22. Of this amount \$50,195.52 is in coin and bonds and \$47,743.13 in redeemed warrants.

Ed Miller was brought down from Hillside yesterday suffering from several bruises received in an explosion at the Gold Gem mine. He was "splitting" a hole when a defective fuse went off prematurely. The shot threw rocks into various parts of his body. He was taken to the county hospital where Dr. Reid attended him.

The prohibition met in the law library this morning, a full membership being present, and organized by electing J. M. Hensley chairman and Hon. C. W. Wagner secretary.

Attorney Kiethe came here today from Fresno on legal business.

## Reputation Eye Glasses

Too much cannot be said in favor of perfect fitting eye glasses. To this particular feature we give the most careful attention. As a result we fully enjoy the reputation our glasses have won through our scientific fitting.

Realizing how entirely our patrons depend on our science and ability to relieve their eye defects we never relax our interest in their case.

Our Glasses Guaranteed. THERE'S NO RISK. CONSULTATION FREE.

## VALLEY VETERANS MEET IN DINUBA

Principal Session Will Be Held Today.

Pavilion to Be Built for the Citrus Fair—Clean-Up Day Is Held.

DINUBA, Oct. 5.—This city is entertaining the members of the San Joaquin Valley Veterans Association this week. The veterans commenced to arrive this morning and by night it is expected that a majority of the members of the organization will be here. This evening the annual camp fire was held, and the old soldiers and their relatives and friends had a jolly time. Many interesting lectures, contributed to the pleasure of the evening. The camp ground is being established in the park at the school grounds and during tomorrow—the principal day of the gathering—there will be many addresses by veterans and local porters. A number of the ministers of the city have been invited to speak at various times.

At a meeting of the citrus fair committee held yesterday afternoon W. F. Day was elected the chairman of the executive committee of the fair association and W. H. Perkins, secretary. The plans for the pavilion were adopted and bids invited for the construction of the same. The design for the large pavilion was also decided upon, and the plans will be issued and circulated. Work on the premium list is progressing and it will not be long before the booklet is ready for distribution. It is planned to have the temporary pavilion on the "Dickey" corner adjoining the "Crown" and "Rink" will be 100x100 feet. The rink is about 80x100 feet, and the two combined will furnish the largest pavilion for the exhibits ever provided for a citrus fair in this county. The machinery tent will be located on the railroad reservation about a hundred yards from the pavilion and will furnish ample room for all the machinery exhibits. According to present indications the number and quality of the exhibits for the fair this year will be larger than in any previous year. Many parties have been inquiring for exhibit space and the outlook is very bright.

This is "clean-up" day for Dinuba, and at 8 o'clock this morning the ringing of the fire bell reminded people of the fact. An effort is being made to have the city generally cleaned up and the unsightly weeds that find a place along sidewalks in so many California towns will be banished to the ash heap.

The young people of the Dinuba high school are arranging for the holding of an interesting entertainment in Central block hall Saturday afternoon and evening, and from previous indications the affair will be very interesting and popular. The several classes are to furnish each a part of the entertainment. The seniors give the program for the evening, the juniors serve the coffee and sandwiches, the sophomores the ice cream and cake, while the freshmen have charge of the "fish pond" and the "pink lemonade" stand. The proceeds of the affair go to the athletic fund of the school.

Rev. W. F. Fenton of the M. P. church, South, left this morning for San Jose, where he will attend the meeting of the Pacific annual conference of the church.

Dinuba Grange will hold a very interesting meeting in this city next Sunday and among the features of the session will be a paper by W. A. Bates on "Is it practical for the government to market the raisin crop of California, or against its interest?"

**WORK WEAKENS THE KIDNEYS**

Doan's Kidney Pills Have Done Great Service for People Who Work in Fresno.

Most Fresno people work every day in some strained, unnatural position, bending constantly over a desk, riding on jolting wagons or cars, doing laborious household work, reaching or pulling, or trying the back in a hundred and one other ways. All these strains tend to wear, weaken and injure the kidneys until they fall behind and the result is ailing kidneys, backache, and finally the poisons from the blood. Doan's Kidney Pills cure sick kidneys, put new strength in bad backs. Fresno cures prove it.

Scott W. Gibbons, 1008 P Street, Fresno, Cal., says: "I first noticed symptoms of kidney complaint in my case about a year and a half ago. The trouble became worse and finally I was taken with a severe attack, being compelled to lay off work for two weeks. After this attack, but later I strained my back while doing some heavy lifting and from that time on I suffered severely. I at last learned of Doan's Kidney Pills and procured a box at Ficker & Co's drug store. I noticed an improvement before I had taken one-half the contents and I was thus led to continue their use until the backache was removed. There has been no recurrence of the trouble up to the present time."

For sale by all dealers. Price 50 cents. Foster-Lillburn Co., Buffalo, New York, sole agents for the United States. Remember the name—Doan's—and take no other.

## SUPERVISORS PAY BIG SUM FOR OIL

Over \$5000 Spent in Each of Four Districts.

Former Pastor of St. Mary's Church, Visalia, Dies in Ireland.

VISALIA, Oct. 5.—The supervisors this afternoon allowed the bill of the Adeline Oil Company for the sum of \$21,251.68 for oil put upon the county roads during the past several months, being in four of the districts. Supervisor Martin has been too busy reconstructing bridges to use oil at this time.

The sums expended in each district were very close to the same figure, the lowest amount being \$4139.32 in district No. 3 and the highest \$5000.10 in district No. 2.

Frank W. Hawkins and Miss Lena May Cotton, both of Visalia, were married in Fresno yesterday. They will make their home in this city, where both are well known.

Rev. D. F. Farrelly, word of whose death in Ireland has just been received, was pastor of St. Mary's Catholic church in Visalia from 1891 to 1896.

He was a public spirited gentleman and was generally liked by both Catholics and Protestants.

A petition for letters of administration was filed today in the estate of Charles P. Brown, deceased. The estate consists of real property in the vicinity of Farmersville, valued at about \$5000. He left no will. The heirs are the surviving wife, Mrs. Margaret Brown, who is the petitioner, and George, Clarence and Frank Brown, and Mrs. Edith Lipscomb of this city.

Ray Johnson, son of H. H. Johnson of Dinuba, was taken to the Whittier reform school today by Probation Officer T. J. Cross. Young Johnson was brought in from the Alta town weeks ago on a charge of assault upon a rancher of that place. He was released on promise to behave. Friday evening he was discovered by Officer Cross in a drunken condition. His commitment followed. Young Johnson is in his seventeenth year.

Mrs. E. F. Kreiss left today for Illinois, having in charge the infant daughter of L. P. Russell of this city, born some months ago at the time of the death of its mother in a Fresno automobile. The child will be left with relatives in that state.

Considerable interest is being manifested locally in the trial in Fresno of George Webster for the murder of Joe Batty in Coalinga. Both Batty and Webster were formerly well known to a number of people in this city.

Henry Jerusalem, who left this city some months ago for a trip around the world, is now in New York city, after having visited in Hawaii, Japan, China, Siberia, and many countries in Europe and the British Isles. He will arrive in Visalia in the next few weeks.

Ray Jordan spent today with his parents in this city. He is a member of the University of California Rugby team and stopped off on his way back to Berkeley from a social luncheon at where the team has completed a series of games.

Mrs. W. E. Dufrey of Fresno is here on a visit to relatives and friends.

**MAN OF 65 WEDS WOMAN OF SIXTY**

Bride Comes from San Jose to Become the Wife of a Reedley Resident.

REEDLEY, Oct. 4.—On Sunday afternoon Justice Mitchell united in marriage O. H. Ward and Alice G. Dunton. The bride, aged 60, had arrived from San Jose on the afternoon train, and at the conclusion of the ceremony, the groom, aged 65, took her to his home south of town, where they will reside.

The local Woman's Christian Temperance Union gave a reception on Friday evening in honor of the school teachers. Mrs. C. W. Horner offered her home for the occasion, and in spite of the rain it was a merry crowd that gathered. The ladies were accompanied by their husbands and escorts, and the company was entertained by an informal program that interspersed social conversation with songs and waterfalls being served before the guests took their departure. The home had been prettily decorated, and Miss Mabel Horner and Miss Prudence Snook assisted in receiving.

Mr. and Mrs. B. C. Gillingham arrived in Reedley Sunday evening to spend the winter here. They have come from their home in Philadelphia to be with their sons, James and Walter, and their daughter, Mrs. W. D. Terry, who went to Fresno on Sunday to meet them.

Mrs. O. D. Lyon and Miss Florence Berg left on Monday morning for Sonoma, where, as delegates to the Episcopal convocation in session this week, they will represent the local church.

Otto Hendrickson left for Fresno on Monday, where he has taken charge of the Sunset lodging house, which property he recently purchased.

Mrs. L. B. Cary entertained a number of guests on a social luncheon at her home on Friday afternoon. Mrs. Cary is a delightful hostess and her guests passed the afternoon pleasantly.

## WORKMAN RECOVERS FROM 30,000 VOLTS

Man Hurt at Power Plant Recovers Memory.

Outside District Admitted to Corporate Limits in Formal Election.

PORTERVILLE, Oct. 5.—John Bass, who has the unique distinction of being alive after having taken through his body a current of 30,000 volts of electricity, is rapidly improving at the Mt. Whitney hospital and it is probably that he will recover. Bass has recovered his memory and is now able to tell the cause of the accident. He says that he went into the transformer room of the plant at Globe to clean the windings, as he had noticed a day or two before that they were very dirty. As these windings are some distance from the ground, he secured a long piece of gas pipe and to the end tied a large piece of waste. Attaching this waste he started to his self-appointed task. Through the windings which he was intending to clean, run the wires carrying the entire current from the plant. His improvised cleaning apparatus came in contact with one of these wires, and shortly afterward, Bass woke up in the hospital. It is said that an extensive skin grafting operation will be necessary to cover the burns on the man's body, but he will undoubtedly recover.

Engineer G. L. Hoxie of Fresno has telegraphed the city engineer here that he has finished the inspection of the pipe which is to be used for the construction of the city sewer system and that ten carloads of the material are now being prepared for shipment from Riverside. The Fresno contractors, who are to do the work, are here today signing up their contracts and will be ready to go to work as soon as the pipe arrives. The contractors state that while they will employ all the local men they can get for the work, they intend that the largest number of their employees will be brought from a Russian-German colony near Fresno, arrangements having already been made to bring them to this city.

Amicable settlement was made at the meeting of the council last night, between the city and the Tule River Lumber Company, in regard to the use of the Main street bridge over the Tule, by the traction engines of the company. The council had prepared an ordinance forbidding the loading of any loads more than five tons in weight over the bridge, and this would effectively shut out the engines. F. U. Norrizer, general manager of the company, appeared before the board and upon the council agreeing that the ordinance would be held up for the present, the company agrees to file a bond conditioned upon their putting the bridge in perfect repair when their engines are retired for the season. Next spring the company and one other corporation here hauling with traction engines, have agreed that they will build their own bridge.

An election with but one side was held in this city today when a large and wealthy section of residents property was taken into the city limits. Several weeks ago a number of the residents of upper Mill street asked that they be taken into the municipality. According to the new California law, an election is necessary in such cases, and a majority vote must be cast by those within the present limits of the city as well as those in the territory it is proposed to annex. In this case, the territory outside was carefully canvassed before the election was called, with the result that only those properties were included in the petition, whose owners were in favor of annexation. A very light vote was cast, as the result was a foregone conclusion.

There promises to be a court chapter of the construction of the sewer system, between the city on one side and Dr. J. L. Hardeman on the other. According to the lines as they were laid out, several hundred feet of the mains are laid through private property, going through Dr. Hardeman's property among others. All of the other owners have signed rights of way deeds, but he insists that before he will sign certain work must be done by the city upon the streets facing other of his property. The council has given him a few days grace in which to sign, and at the expiration of that period suit will be instituted.

Just at the moment when it appeared that the general fund of the city finances was going "hooked," and bills of the city would be performed paid by warrant, a number of public spirited citizens paid up their taxes and the difficulty will be solved over for at least one month. It is probable that before the expiration of that period the financial stranding of the city will be satisfactory again.

**SELMA TO RETAIN POPULAR PASTORS**

The Congregations Prevent Prospective Changes.

Many Systems of Street Improvement Presented to City Trustees.

SELMA, Oct. 5.—The appreciation of good pastors has been twice demonstrated in Selma church circles during the past week, by the Baptist congregation persuading Rev. Ronch to withdraw his resignation, and by the members of the First Methodist church prevailing upon their bishop to reappoint Rev. McConnell to this charge, after assigning him to Porterville. It was rather singular that the prospect of removal of both pastors occurred at the same time and that the congregations came to a unit in demanding the pastors stay. Rev. Ronch arrived here on Sunday and was surprised to find his resignation on account of a call to other fields, but by unanimous vote his church members asked him to reconsider, and yesterday

## SCHOOL CHILDREN WILL NOT GATHER

Teachers Abandon Idea of  
Assemblage Sunday.

Believe It Is Inadvisable on  
Account of Day; Many  
Parents Object.

At a meeting of the school principals held in C. L. McFarlane's office yesterday, it was unanimously decided to abandon the idea of having a big gathering of school children next Sunday afternoon when President Taft arrives in Fresno.

In the discussion preceding the vote the principals were of the opinion that it would be inadvisable to attempt a

display of school children, naming several reasons. One of the principal reasons was that the day was too late in the season for a large gathering of children. Another reason was that many parents objected to their children being out of the house on Sunday.

## FAIRWEATHER FOR TIELMAN COMPANY

Tells of Advantage of Cor-  
poration.

No Danger of Overproduc-  
tion If Raisins Are Pro-  
perly Marketed.

Editor Republican—During the last month I have often been asked my opinion on fairly matters, as to a corporation. I have refrained from writing on this on the subject, yet have been urged to do so many times.

First, I am unqualifiedly in favor of the corporation plan, and for these reasons:

All members will be on the same footing, on an equality, according to their individual interests, and this is as it should be. Also in a corporation with plenty of capital it will be a much stronger to withstand any and every kind of adversity than a sole proprietorship. It will be a positive concern and every raisin grower who joins it may feel that he will get and will be assured of a square deal.

In an article of incorporation it will be empowered to do its business in its own way, without any limitation from outside sources. It will be in a position to "make good." There is no doubt it will first attempt to sell its product for cash in the open market. If the market is a combination of individuals, it will be a source of strength to the corporation in buying and marketing the crop, the corporation will be in a position to go on and market it themselves.

And in my personal opinion, the grower's corporation will, under any conditions, have to put men in the East to see that our raisins are going on the market and into the consumers' hands at and on a fair, reasonable profit to all interests between the producer and consumer. The corporation will have to see that the product is fairly and honestly packed at this end of the line, so that rejections at the other end will be a thing of the past. The corporation's work will not stop merely at selling the crop in the open market, but will have to see to it that the little things that will get our product consumed easily every year, that is if the packers don't do it. And the corporation will be in a financial position to see that it is done.

We have no thoughts of an overproduction of a hold-over, under a corporation, because it will have a board of directors that will see to it that not less than two per cent per capita will be paid to each member every year, and with this done there will be no overproduction, and this two per cent consumption can easily be reached if men are put in the field to sell where our consumers are. Growers, we should not think about holders of any part of the crop. In my opinion we have an average enough of land to overstock the market when it is properly handled.

I saw Mr. Hobbs' report from his Eastern trip, which in my small way I can verify. The trade in the East wants to see growers to produce a square enough to offer exporters, in a position to establish a price, on our product then the trade is ready to talk business, but not unless we create some stability. If we establish a corporation with capital behind it, then the trade can be assured when it buys, the

price will not be reduced, and this we must do. Let us be wise for once and do it.

Hence with a corporation, as proposed by the Tielman company, every raisin grower who joins it, and even one should do so, will be on the same footing according to his interests, and if it is a good thing for the large growers it cannot fail to be as good for the small growers. Now growers don't let us quibble let us get it together in this corporation and then we are safe. I care not who is the board of directors selected. Their names are to be given out next Saturday. No doubt they are good men, but if we don't have a new board we'll be elected next April. All this will be done according to law and business. Thousands of other businesses are carried on properly and successfully so with a raisin corporation, and we will prosper and control our fate. It is the only thing for us to do to be successful, let us do it and do it successfully in a matter of two weeks. Then there is no doubt we will see the raisin market stiffen at once, and this year and the hold-over will take care of itself. I only believe if we do this a hold-over will be a thing of the past, in a matter of three months our raisins will be sold at a better price than ever, and the people will consume our raisins. If we will give them our names.

## DESERTER OF WIFE PUT UNDER BONDS

Jones, Brought from Los Angeles, Makes  
Up With Wife; Must Pay Court  
Costs.

H. W. Jones appeared before Judge Briggs yesterday afternoon to answer a complaint filed on behalf of the Fresno County Humane Society some three months ago, charging him with having deserted his wife and left her destitute.

At the time the complaint was issued the wife told the court that the husband had been working for the Worswick Packing Company as a packer, and that he drew \$20 on the previous Monday and told her that he was going to Mexico and she could shift for herself. There was not a cent in the house or any food, she was absolutely destitute.

The warrant was not served until last Thursday, when the husband's address was ascertained to be Los Angeles. He was arrested there, and the police officer was sent to bring him to Fresno. He was represented in court by Attorney Burns, who informed the court that the parties had been married three months ago, and since he had been admitted to bail he had been living with his wife and promised never to desert her again, and he asked that the case be dismissed. This course was opposed by Deputy District Attorney Harrison and Wm. Harvey, Sr., who represented the humane society in the prosecution on the ground that the wife had been put to the expense of bringing the defendant from Los Angeles, and the law should not be invoked unless a prosecution is intended. The court made the order that the defendant should enter into a bond with sufficient sureties for a bond sum that he would support his wife, and failing to do so the bond would be enforced, and the defendant was ordered to pay the cost of the officer for bringing him from Los Angeles. This was consented to, and the defendant was let out on bail until such time as a good and sufficient bond should be filed.

## JAPANESE POACHERS ARE TO BE DEPORTED

SEATTLE, Oct. 5. The steamer Haida, bound for Alaska today, with thirty-five Japanese seal poachers who have not finished terms of imprisonment in Alaska and are still prisoners, charged with crime, is to be sent to the United States. They will be deported to Japan.

## PLAN INSTITUTES FOR THIS VALLEY

University to Get Close to  
Farmers.

Special Needs of Various  
Districts Are to Be Par-  
ticularly Considered.

Plans are now being made for a series of farmers' institutes, under the auspices of the college of agriculture, University of California. Prof. Warren T. Clarke, director, wherein the San Joaquin valley will fare better than ever before in the number of these gatherings and the superior qualities of the instructors.

It is Prof. Clarke's aim to get in close touch with the farmers of the valley, and in that manner, learn in advance, the special needs of each locality, where institutes are to be held, so that he may provide special instruction to deal with these local conditions.

In order to do these things most effectively a Fresno citizen, who has a large personal acquaintance with the farmers and fruit growers of the valley, and knows many of their needs, aspirations and opportunities, has been appointed to arrange these institutes with local farmers, and other citizens, and to select the properly qualified instructors for the several communities.

Being a member of the Farmers' Union and the Grange, this gentleman expects to ask for the cooperation of these organizations of farmers, to assist him in advertising these forthcoming institutes, and help in other ways to make them a success in point of attendance and in every other respect.

Several requests for institutes, are already on file, from a number of colonies and towns throughout the several counties of the valley. These include Modesto and Turlock in Stanislaus county; Alhambra, Le Grand and Merced in Merced county; Madera in Madera county; Clovis, Selma, Kernan, Easton, Parlier, Modesto and Fowler in Fresno county; Dinuba and Tulare in Tulare county; Hanford and Lemoore in Kings county. Other points will doubtless be added to the list of institutes before the sessions begin.

The Farmers' Union local at Parlier, which meets next Saturday evening, will take up the details of its institute. Its secretary has already designed the heavy cooperation of its members and citizens generally in making the Parlier institute a memorable one. The local organizer of these institutes hopes to meet with the Parlier local, on the evening named, to assist in planning out its forthcoming gathering of farmers and fruit growers.

Meetings of such locals, at other places, for institute preparation purposes are being exploited by the officers of these unions of farmers.

## M'MULLIN'S NAME CHANGED TO DUBOIS

Streets and alleys in Du Bois and roads and avenues in Du Bois colony in road district 4 have been accepted by the supervisors. Du Bois is the name of the newly plotted town, north of Fresno, and once known to fame as McMillin.

## There's Great En- thusiasm About Our Garments and Hats

Perhaps you've heard about it from your friends, perhaps they told you what a swell suit you can get here at \$25, \$30 and \$35.00 and what a great assortment we have of the still higher priced ones. And

## About the Hats

how pretty they are at \$5, \$7.50 and \$10, and how beautiful and reasonable our better hats are. Now we ask you to come, spend a

few moments with us and see for yourself that this enthusiasm is fully justified

### WELCOME TAFT

California salutes the President. California also welcomes William Howard Taft. For both in his official and in his personal capacity, President Taft is a welcome guest.

As President of the United States, he personifies the nation to whose ideals no state is more loyal than California. He is the head, of the great people at whose front door we stand sentinel. He is also the power, to get for us the public rights and favors we desire. His great office fills our imagination and the friendly use of its powers will help all our coffers. The President is welcome.

Mr. Taft is also welcome personally, as the friend of California and the West. The movement that made him president had its origin and inspiration in the West. The career that made him a presidential possibility had its goal largely in the West. Mr. Taft's introduction to the world was in a speech in San Francisco, on the eve of his departure for the Philippines, ten years ago. Before that day, he was an Ohio judge of high character and distinguished ability. From that day he was one of the few chief citizens of the world, at the beginning of a career which for comprehensive versatility is not paralleled by that of any other American. It was the work of Taft that made the Golden Gate the front gate of the American republic.

The relations with the Orient, even outside of the Philippines, on which our future depends, are largely his creation. To him more than any one else we owe the prospect of the early completion of the Panama canal. As Roosevelt gave impetus to the internal development of the West, so Taft determined its outlook toward the world. To these two men, each in his own part, the West owes more than to any other individual men or groups of men in the world. The interest of President Taft in us and in our problems has been attested by numberless services. His big and genial personality is congenial to the West. We appreciate him and we like him. William Howard Taft is welcome.

### LEGAL MAXIMS

One of the most interesting articles we have read for a long time is that by Warren Olney, Sr., in the last California Weekly on "Origins of Revered Legal Maxims."

Mr. Olney takes up particularly the principles that a man is presumed innocent until proved guilty beyond a reasonable doubt, and that he shall not be required to give testimony against himself. At the time when these rules originated, the defendant was not allowed the services of counsel, was not allowed to present testimony to contradict the charge against him, was not informed of the nature of the evidence, and was not necessarily confronted by the witnesses. Moreover, by the misuse of a scriptural text, it was a rule of evidence that any fact testified to by two witnesses was conclusively presumed to be true, and could not be rebutted, either by contradictory testimony or by inconsistent circumstances. Even after the defendant was permitted to introduce witnesses, they were not sworn, and especially they were not permitted to testify to anything contrary to the "libel" or indictment. For instance, if a defendant was charged with killing a certain person, by stabbing him, testimony to show that the person died of natural causes could not be admitted. The theory was that since the accused was required to prove his exact charge, beyond a reasonable doubt, the defendant, if innocent, would be acquitted by the inevitable impossibility of so proving the case, and defense was therefore a superfluous incentive to perjury. Obviously, also, since the accused was not permitted to defend himself, he could not decently be required to participate in his own prosecution.

It is evident, then, that these principles of the law were adopted as a substitute for defense, at a time when a person accused of crime had no other protection. Also, they were quite proper and logical parts of the system in vogue. If only the prosecution's side of the case can be presented that case must necessarily be lawless, to justify a conviction. But now that an accused person has the right to defend himself, and to be assisted by lawyers and witnesses in doing it, the traditional rule is no longer logical. It frequently happens that one fact in the chain of circumstances is in the sole custody of the defendant. The prosecution can not present it, but the defendant, if innocent, can. In such a case, the failure of the defendant to meet that point logically and morally completes the prosecution's case. But legally we still adhere to the ancient rule, adopted at a time when the defendant was denied the privilege of meeting the point.

This is the present actual situation in the Calhoun case. Certain facts are in the sole custody of Calhoun—either his personal knowledge, or in certain things which he has removed from the public domain, in the sense

testimony can be so surrounded with circumstances that there is only one reasonable inference left, and every untrammelled mind, outside of the jury-box, makes that inference. But in the jury-box, it is possible to press too far the doctrine of any other "possible" interpretation, so as to reject the only reasonable interpretation on the pretext that some other unreasonable one might not be quite impossible. But since the reason the prosecution does not present direct testimony on these points is that it is a physical impossibility to do so, while the defense could easily present it, and would presumably do so if it would establish Calhoun's innocence, it follows by every sort of justice and logic except that handed down in the courts that the omission of the defense have completed the case of the prosecution. The reason why the rule of legal thinking differs from that of human reason has long since disappeared, and the law ought now to be made what it would have been from the beginning if the accused had then possessed his present privilege of defense.

Mr. Olney proposes some radical reforms. He would have the prisoner taken immediately on arrest before a judge of the superior court, and there publicly examined. His answers or refusals to answer should be taken down, and should be admissible for use at the subsequent trial. If the arrest is a mistake, this examination will practically always reveal it as such. "It is a fact, however," Mr. Olney says, "that in almost all cases the accused is really guilty." In these cases, he would give his case away decently, under the law, instead of under the present conditions of the brutal "third degree." At the final trial, there should be no challenge of the grand jury; few or no challenges "for cause" of the trial jury; but a certain number of peremptory challenges. The judge should actively control the case, and sum up the evidence to the jury, as in England.

These are radical reforms, but they are no "dayman's nonsense." They are proposed by an eminent and scholarly attorney, of long experience and great success at the bar.

### STRENGTHEN THE LAW

There is to be some prospect that the transcontinental railroads will withdraw from their threatened grab of a third or more of the increased tariff on lemons. Perhaps they were only bluffing, to begin with. Or perhaps they have been bluffed out of their bluff. Anyway, if they do not exact the threatened increase of freight, that is the main thing.

But this only adds one more to the numerous facts which demonstrate the necessity of further strengthening the interstate commerce law. The next step proposed is to forbid any increase in rates going into effect until it has been passed on and approved by the Interstate Commerce Commission. Of course if the commission refused its approval, the railroads could appeal to the courts, but the point is that the rate actually paid by the shipper should be the old rate until the new rate has received legal sanction. The theory is that the old rate is presumed to be at least tolerable, and that no possible question of constitutionality can therefore arise if the law automatically holds it in effect until the right of some other rate is established. It is the old principle of preserving the status quo until the issue is settled; only in this case it is done automatically, by uniform law, instead of arbitrarily by emergency injunction.

Whether even this will be strong enough we can not know until it is tried. It is strong enough if under it, the thing is done which the law says shall be done. This proposed law will say that when a proposed increase in rates is announced, goods shall nevertheless continue to be shipped at the old rates, until the increase is approved. If, under this law, goods are shipped at the rate at which the law says they shall be shipped, then the law is strong enough. But if it happens with this law, as it has with all others, that when the law says the rate is \$1, and the railroad says it is \$1.15, the shipper has to pay the \$1.15, then the law is not strong enough. A right which the courts will sustain, at the end of litigation, is not right enough in business. The only right to ship at \$1 which is worth anything is the right which will enable the shipper to take his goods immediately to the railroad and ship for \$1. Up to the present time we have never had a law that would do that.

The strengthening of the interstate commerce law must keep on, step by step, until it reaches this goal. If there is no way short of public ownership by which regulation can be made to regulate, then we can not stop until we get to public ownership. But overwhelming American sentiment rejects public ownership except as a last possible resort, and we may rest confident that American regulation will stop at any point short of ownership, where regulation is effective. But the one absolute test is that of results. And the only satisfactory result is that which gives the shipper not ultimate redress for his wrongs but present use of his rights—which assures him not a lawsuit, but acceptance and delivery of his goods, on tender of the rate fixed by the regulating authority. If a law does not produce this result, in the actual daily conduct of business, then we need a stronger law. And if no law of this degree of effectiveness can be put into operation under our present legal system, then we must either get a new legal system or quit regulating business. For no business regulation is worth anything in business unless business can be done under it.

### IRVING STRINGHAM

The sudden death of Professor Irving Stringham, professor of mathematics and acting president of the University of California, on the very day on which he was to have given official welcome to President Taft, dramatically removes not merely a distinguished scholar, but one of

the admirable citizens of California. A certain personal shyness and mental aloofness made Professor Stringham too little known to the people of the state. His triumphs were in a realm of pure intellect which even his special students found it difficult to approach. Because his most numerous contacts were with students, in the most abstract and impersonal of all subjects, and in the highest and most abstract reaches of that subject, the most widespread impression of Professor Stringham is probably that of impersonal intellectuality. To his colleagues on the faculty, and to those who have come in contact with him in numerous public activities, the other side of Professor Stringham's character was open—that of a warm-hearted, high-minded, loyal gentleman and a most earnest and patriotic good citizen, whose large though quiet influence was always exerted on the side of right and progress. It is the misfortune of our imperfectly developed condition that larger public use can not be made of men of Professor Stringham's quality of leadership.

### PETTY OFFENDERS IN POLICE COURT

Perfecto Aranda, who was arrested several weeks ago in this city and charged with the theft of a number of pairs of shoes from a Santa Fe freight car, was re-arrested yesterday on a charge of having stolen goods in his possession, the officers not being able to get enough evidence to hold the man for burglary.

It. R. Young, the negro, brought back from Los Angeles on a charge of forgery, was held to answer to the superior court yesterday by Judge Briggs yesterday on two charges, bail being fixed at \$500 in each case. A third charge of forgery has been preferred by U. S. District Judge Tamm's court.

Will James and Charles Blackledge, who were arrested in the red light district Monday night, were given a 100 day fluster out of town by Judge Briggs yesterday.

**HUGE APPLES FOR PRESIDENT TAFT**  
 Four apples have been received at the Chamber of Commerce from the Los Angeles ranch at Pine Ridge to be given to President Taft when he arrives in Fresno. The four apples together weigh six pounds and three ounces. The largest of the number weighs twenty-seven ounces.

**DIED**  
 WERNER, in Fresno, October 5, 1909. Frederick Werner, a native of Germany, aged 52 years and 11 months.

Funeral services from the residence of Mrs. E. C. Werner, 1015 N. Broadway, at 10 o'clock, Rev. S. H. Werner officiating. Interment Mountain View cemetery.

Tom Miggins was arrested last night for drunkenness and indecent exposure. Perry Caswell was arrested for disturbing the peace and Lewis H. King was arrested for vagrancy.

W. Hawaki, who was arrested on Sunday for hunting without a license, was fined \$10 yesterday by Judge Smith.

**PEARY WELCOMED BY ARCTIC CLUB**  
 Statement Will Be Issued in a Few Days Regarding Controversy With Cook.

NEW YORK, Oct. 5.—The officers of the Peary Arctic club held a meeting today formally to pass on proofs held by Commander Peary to show that Dr. Cook did not reach the pole. The statement will be made public in a few days.

The following resolution was adopted by the officers of the club: "That the Peary Arctic club cordially welcomes home Commander Robert E. Peary, C. E. U. S. N., and congratulates him upon the attainment, April 6, 1909, of the North Pole, crowning years of arduous Arctic work, devotion to ideals and loyalty to country and invites him to honor it with his company at a dinner at a local restaurant."

"That the club tenders to the officers, scientific staff and men of the expedition its thanks and appreciation for zealous performance of duty, which, with superior discipline and excellent team work, resulted in complete success."

The crew of the Arctic ship Roosevelt was paid off today and given transportation home to New Foundland.

**MAGNIFICENCE FOR TAFT RECEPTION**  
 President Diaz Will Lay Cornerstone of Monument to Benito Juarez, Liberator of Mexico.

MEXICO CITY, Oct. 5.—Mexico is preparing to entertain President Taft on a scale of royal magnificence, it was announced today.

The historical and celebrated presidential silver and plate, comprising a great portion of silver and china forming the banquet service of Emperor Maximilian, will be used at the banquet at Ciudad Juarez. The set comprises several thousand pieces and is said to compare favorably in richness with the famous sets of royalty.

Work is being pushed on the Benito Juarez monument so that General Diaz can lay the cornerstone of the monument to the memory of the man who forced Maximilian from the Mexican throne.

**A FINE LINE**  
 Of stationery just arrived at Smith Bros. Drug Store.

We have two sizes of cracked corn, the cleanest you can find. Mottel Milling Co., 11 and Kern streets.

Dr. Palmer, Osteopath, 35 First St., Phone Main 403. Sclera, Tuesdays and Saturdays.

 The Kind You Have Always Bought

Bears the Signature of J. C. Watson

### PRESIDENT TAFT GUEST OF STATE

(Continued from Page 1.)

**EVENING BANQUET.**  
 At the banquet which was given in his honor tonight at the Fairmont Hotel by more than 600 citizens and representatives of all the various interests of San Francisco, President Taft was presented with a tablet of pure gold. The city paid a similar tribute to Presidents McKinley and Roosevelt on the occasion of their visits here.

Charles S. Wheeler, who had been chosen for the honor of presentation, declared for Mr. Taft as it is more golden with high respect for you and is filled to the brim with the warm love and deep affection of the people of San Francisco.

President Taft, in acknowledging the gift, paid a high tribute to the people of San Francisco for their wonderful recovery from the disaster of three years ago.

**PACIFIC NEEDS.**  
 Before the presentation speech, Governor Hiram Johnson had taken opportunity to tell him a few of the things that California wanted from the national government. He spoke of irrigation, the reclamation of land, the conservation of natural resources, the development of Alaska, the development of the Panama canal, and lastly called out a storm of enthusiastic approval when he declared:

"Mr. President, above all, we want a navy for the Pacific coast and we are convinced enough to believe that you can build it better and cheaper than you can on the Atlantic. The problems of the future are in the Pacific. The battle for trade is in the Pacific. We have no island possessions across the Atlantic and the new navy is drifting into the hands of other nations. We need a navy in the Pacific for the protection of our possessions and our commerce and for peace—not for war."

The president was greeted with cheering and cheering when he arose to speak.

**FIFTH VISIT.**  
 "This is the fifth time," he said, "that I have had the honor and the pleasure of visiting your great city, and I intend to come again when I can. I have not the privilege at any time of staying long, but one of the advantages of your city is that you do not have to stay long to appreciate it. You have so added to the character of San Francisco in the last three years as to make you exceptional in the history of the world. I know how the obstacles of that first year after the fire seemed insurmountable to you, and we in the East were wondering whether your power was to pass northward or southward. But you have overcome all that—showing that I do not know—but you overcome the disaster and all the difficulties that arose among your own population. I don't wonder that you are proud of it, and that your orators can speak of nothing else, for it fills the memory of all the last three years."

**PANAMA CANAL.**  
 The president was cheered when he stated that the Panama canal would certainly be finished by January 1, 1915, and expressed the hope that the day might be done before that time. The president declared that it was true that the future history of the world during the next fifty years lies in the Pacific. America must do something, he said, to secure the growing trade of the Pacific. In urging a merchant marine, the president said that some people were afraid to call the help that was needed a subsidy. He said it was like the case where Tom Reed declared that a certain member of the House of representatives at Washington was opposed to a statute because he was afraid somebody might make a dollar and a half out of it. The president said he was not afraid to call a subsidy a subsidy. He said it was not putting money in any one's pocket, but was merely enabling American shipping interests to compete with foreign nations and to earn only a fair profit.

"One of the great benefits of the Panama canal," the president said, "will be to increase the trade of the East and West coasts of the United States. The canal will take from the coast the heavy class of freight which cannot, or ought not, to pay the heavy traffic charges, and will leave to the railroads that class of freight and merchandise which needs rapid dispatch and is able to pay the high prices."

**FRANCHISES ARE SUBJECT TO TAX**

**Declares Los Angeles Superior Judge in Deciding Against Oil Company.**

LOS ANGELES, Oct. 5.—The doctrine that franchises of corporations are liable for taxation under the laws of California, was upheld in two decisions handed down by Judge James in the superior court here today.

In both cases the Western Union Oil Company was affected. In one suit against the company brought by the county of Los Angeles to recover \$11,027.72, paid in the shape of taxes on the franchise of the company. The finding was for the defendant. The money had been paid under protest and the board of supervisors refused to refund the tax so paid.

In the second action, the city of Los Angeles brought suit against the Western Union Oil Company to compel it to pay \$16,552.41 on its franchise, valued at \$125,000 for taxes of 1907-08, and the finding was for the plaintiff.

**KODAKS**  
 And photo supplies at Parker & Colman's, Phone Main 57.

**Prices**  
 If a consistent value of quality be taken and then a comparison made, our prices will be found most favorable.

We make just such comparisons in all our purchases with the best that the great Eastern markets afford. And on your part such comparisons of prices and quality is always welcomed.

### WRIGHTS WORK TO BETTER AEROPLANE

Perfect Motor Is an Essential to Building of Airship Such as Is Needed.

NEW YORK, Oct. 5.—Wright left for Washington tonight to continue the instruction of army officers in a flying school. He expects to pass two or three weeks in training Lieutenants Latham and Fowles and other officers.

After that he will go to Dayton and arrange for the manufacture of his aeroplanes on an extensive scale.

"We have received many orders," he said, "but have fixed no time for delivery as yet. We are making a serious study of the aeroplane. Every time we go into the air we make a study of some part of the mechanism of some aeroplanes, and then we come back with a view to improving our machine."

"I regard this New York flight of yesterday as a difficult proposition. My brother and myself regard our experiments as being in the same class with Fulton's experiments. We are working with an air that is still in its infancy. So I wanted to take part in this celebration and wished to pay my respects to the men who had the nerve to build the first steamboat."

The excellent yesterday taught me a lesson, the aeroplanes are perfect. We shall have no perfect aeroplanes. My aeroplane seems all right but my motors are not. I hope the day will come when we shall have a perfect motor."

**ROCKEFELLER TALKS TO SUNDAY SCHOOL**

Tells Boys How to Obtain a Job and How to Keep One Afterward.

CLEVELAND, O., Oct. 5.—"Work just as hard when the boss is away as when he is watching you," is John D. Rockefeller's motto for building a job, as related by him to the Sunday school boys of his church—the Euclid Avenue Baptist—last Sunday. First Rockefeller told how to obtain a position.

This is to establish a reputation for honesty, industry and sobriety. Mr. Rockefeller philosophized from his own experience in life. Incidentally he remarked that last Sunday was the fifty-fourth anniversary of the date when he obtained his first job. He was outside and weary when at last he found a chance to go to work. Then he was told to work.

"It was to call after luncheon. A gentleman who knew me was hunted up by my prospective employer," Mr. Rockefeller said. "He told all about me, and I got the job. Remember, boys, when you look for a job, employers will inquire about you, and it's a good thing to have a reputation for honesty. Especially do they inquire of your pastor and teacher. A boy must not necessarily be smart to hold a position, but he must be honest, sober and diligent."

**BIG GIFTS TO YALE.**

NEW HAVEN, Conn., Oct. 5.—At a meeting of the Yale corporation today a gift of \$425,000 from William D. Hoar, a New York lawyer, for the erection and equipment of a physics laboratory was announced. Announcement also was made of the gift of \$25,000 from Alfred G. Vanderbilt toward the general endowment.

**TRUTH ABOUT CATARRH**

Sensible Methods Will Cure It—San Joaquin Drug Company Guarantees Hygiene to the Catarrh.

Catarrh can never be cured by taking medicines into the stomach nor by sprays, atomizers or douches. Intelligent physicians have long ago discarded such ideas and not one of them would be worth consideration were it not for the fact that unscrupulous persons prey upon the ignorance of the people in regard to new discoveries.

Catarrh is caused by germs, and just as long as these germs thrive in the folds, crevices, nooks and corners of the mucous membrane that line the nose, throat and chest, just so long will you have catarrh.

There is only one way to cure catarrh, and that is to kill the germs. There is only one remedy that will kill the germs when it gets where the germs are, and that is Keen's Glad-Pheet.

Hygiene is made chiefly from Australian Eucalyptus and Eucalyptol combined with other germ-killing antiseptics. Just breathe it in through the hard rubber inhaler that comes with each outfit. Relief is immediate. Used regularly for a few weeks Hygiene pronounced (High-onet) will cure chronic catarrh. Complete outfit \$1.00 at San Joaquin Drug Company, and leading druggists everywhere.

**MI-ONA**  
 Cures Indigestion

It relieves stomach misery, sour stomach, belching, and cures all stomach disease or money back. Large box of tablets 50 cents. Druggists in all towns.

**I LOVE TO WALK BUT GLAD MY CORNS!**

KEENE'S GLAD-PHEET

Over \$5000 in Prizes Given Away to Those Sending the Neatest Correct Answer

Do You Want a Piano? Do You Want a Sewing Machine? Do You Want a Phonograph? If so, enter this Contest

The Starr Piano Company have given us a certain amount for advertising purposes. Other piano factories, not to be outdone, have given even more. The White Sewing Machine Company have given their share. This gives us a large sum to distribute in the following novel manner for advertising purposes, and saves the heavy expense of advertising in magazines and by piano and sewing machine salesmen.

1st Grand prize, \$800.00 Rotary White Sewing Machine and Credit Certificate of \$150.00, good on any new piano in our store.

2nd prize, \$75.00 Violin and \$125.00 Credit Certificate.

3rd prize, \$50.00 Guitar and \$120.00 Credit Certificate.

4th prize, \$30.00 Guitar and \$115.00 Credit Certificate.

5th prize, \$20.00 Banjo and \$110.00 Credit Certificate.

6th prize, \$25.00 Cornet and \$115.00 Credit Certificate.

500 Art Pictures and 500 copies of sheet music will be given to those who call at our store and other cash value certificates to the value of \$5000 will be given to contestants. Every one answering will be rewarded.

It's Easy. Simply count the dots within the outline of the White Sewing Machine.

Answer to the best of your ability, whether correct or not. Every body that answers will share in the \$5000 cash value distribution. In former contests, prizes have been evenly distributed, and those living out of town will have the same chance as those in town.

CONDITIONS: Only one in a family and no one engaged in the music business, no employee of this store or winner of prizes in our former contests, will be eligible as a contestant.

The representatives of the papers will act as judges.

The contest will be run fairly and contestants must abide by the decision of the judges.

If we receive a correct answer, the prizes will be awarded to those sending the nearest correct. If more than one correct answer is sent in, no answer will be considered in making the awards.

Contest closes at 4 p. m., October 20th, 1909.

Send your answer with full name and address to

# McNeil & Co.

CONTEST DEPARTMENT, 947 J St., Fresno, Cal

## Social and Club News

October weddings have absorbed the attention of the younger members of society to the exclusion of almost every other social event—at least the weddings with their attendant festivities.

Last evening the First Baptist church was the scene of a very large church wedding which united two very well known young people of this city. Miss Edna Evans, eldest daughter of Mr. and Mrs. A. B. Evans, and Clinton Miller, a popular young business man of this city. The bride is an exceedingly attractive girl and a leader among a very congenial set of young

people in the Baptist church, where the groom is also prominent. He has also been closely identified with Y. M. C. A. work and is regarded as a most enthusiastic and valuable member of that organization.

The church was made unusually beautiful for the happy event, the bride's girl friends having the decorations in charge. Quantities of beautiful gumdrops decorated the woodwork about the pulpit and formed an effective background for the more delicate coloring of the pink and white blossoms that formed the color scheme of wedding. Dozens of beautiful roses were used with artistic effect while hanging baskets and potted

plants completed the pretty decorative scheme.

Professor Taylor presided at the organ and Mrs. Ralph A. Powell sang a very beautiful solo before the ceremony. Two dainty little flower girls, Misses Laura Pratt and Doris Barr, arrayed in frilly frocks of filmy white, led the bridal procession. They were followed by the bridesmaids, Misses Georgia Duhig and Elma Clark of Madera, gownned alike in pale blue. Misses Mattie Bonnel and Rose Smith in dainty white frocks. They carried pink carnations.

Miss Lucia Huber, the maid of honor, preceded the bride. She was becomingly gownned in cream colored silk and carried a shower of Cecile Bruner roses. The bride looked very lovely in her soft, shimmering gown of white messaline satin over which fell the long graceful folds of the tulle veil caught in her hair with lilacs of the same delicate blossoms.

The ushers were Milton Dodge, Kirk Taylor, Leslie Hilton, Newton McCabe. Bryant Asaton acted as Mr. Miller's best man. At the altar the bride's party was met by the groom, his best man and the officiating clergyman, Rev. A. B. Smith, who performed the impressive ring ceremony.

To the joyous strains of the Mendelssohn march the wedding party left the church and were driven to where a wedding supper was served. The decorations consisted of a simple arrangement of greenery and roses. Numbers of beautiful gifts in silver, cut glass and china, besides more practical gifts, were showered upon the happy young pair, who claim a host of friends in and about Fresno. After November 1st they are to be at home to their friends in their own attractive home at 218 Coast avenue which is in readiness for their occupancy.

The man was real angry. "That's the third time you've given me the wrong number; you must have the telephone ear." Girl at central office: "I beg your pardon, sir, but that isn't the trouble; you have what we call the cornmeal mush voice."

I heard a fellow say that a man is not necessarily hot-headed because he wears a stove-pipe hat or quarrelsome when he dons a claw-hammer coat.

Well, we have the good idea but no stove lids, the good swallow-tail coats but no hammer. A knocker wouldn't trade with us. Come in and pipe the new-sky pieces. They are all to the good this fall. I mean the derbies. And the "sotis," too. "WILLIE," with

### Engagement Rings

It is up to you to see that she gets a good ring. The best is none too good for her.

WEDDING RINGS

**McCarthy's Jewelry Shop**  
1118 J STREET

arrangements for it have been absorbing the attention of the bride's particular friends for some weeks. The ceremony is to take place on the lawn and later supper will be served indoors. At least these were the original plans and if the weather permits will probably be carried out. The bride's trousseau is a marvel of daintiness and elegance and any number of beautiful gifts have been showered upon this popular bride.

Mr. and Mrs. Frank Short have been spending the past few days at the Fairmont hotel in San Francisco, returning home today.

Dr. and Mrs. Ellsworth of San Francisco, close friends of the Fulton G. Berry family, are visitors in Fresno for a brief stay.

Mr. and Mrs. William Vogel of Clinton, Illinois, are the guests of the former's brother and his wife, Mr. and Mrs. Bert Vogel. Mr. Vogel is also a brother of Mrs. Charles McCardle and Mrs. Millie Hall.

On Monday evening a merry party of friends surprised Miss Vera Hayes at her home, 133 Abby street, with a linen shower in anticipation of her coming marriage to Mr. E. E. Bonquet of San Francisco. Those present were: Rev. Wallace, Mr. and Mrs. E. Nelson, W. Dick, T. W. Pickford, N. E. James, J. Clardy, F. Hayes; Mesdames Holden, Pickford, Chancy, Myers, Jumper, Weller, Aspery, Machen, Collins, Elder, Hayes, Grandiana, Pickford, Misses Wallis, Hart, James, Cronkette, Moore, Grover; Mr. F. Stetson and B. Howard.

### "CORNER GROCERY" BRINGS BIG LAUGH

Hallett Company at the Empire Give the Broad Farce a Clever Rendition.

The Hallett players delighted a packed house at the Empire last night in Daniel Sully's "The Corner Grocery." Those who have seen the company only in legitimate roles were surprised at the manner in which the members adapted themselves to the broad farce lines of the opening act, and through their cleverness to carry their audience with them through the hurry and bang of the beginning of the play to the more quiet and serious scenes in the acts that follow.

The plot of the play centers around "Michael Nolan," known by his associates as "Daddy." Al H. Hallett essayed this exacting role, and avoided the temptation to burlesque the character—a fault all too common among actors presenting roles of this kind. Mr. Hallett makes "Daddy" human, and the audience laughed at his eccentricities, sympathized with him in his troubles, and wept at his misfortune.

The most industrious person in the play is "Jimmy Nolan," cleverly portrayed by Miss Inez Baland. But "Jimmy's" energies are not expended in such ordinary occupation as work. It hasn't time for that. Some one in "Jimmy's" neighborhood might have a moment's peace if he went to work, and "Jimmy" is not the boy to permit anything like that.

Mr. Clements makes "Lawyer Ropp" a delightful old rogue, and Miss Gray is pleasing and pretty as "Jennie Burk." Charles Doy is the grocery man; G. Lester Paul makes a typical bawdy cop as "Officer Conroy"; Thurlow White is excellent in the role of "Tom Nolan," and Ferd Muzler does the bit of the messenger. Miss Howe appears as "Mrs. Nolan," and makes the character one of the most prominent in the bill.

Artist Lapworth has had little opportunity to display his skill this week, but the settings equal those used in the original production.

### DR. LONG PASSES IT UP TO HOUSEWIVES

A Visit to Some Slaughter Houses Would Reduce the Meat Bills.

County Health Officer Long contradicts himself palpably in his September report to the supervisors on county sanitary matters. The opening sentence is the self-assuring one that "Nothing unusual in the county during September in the way of disease." The next paragraph springs a mild sensation in the following observations:

"Many complaints of hog-pens in different places being in a filthy condition and some slaughter houses, I believe I am safe in saying that if the supervisors of Fresno would take a drive to the slaughter houses of the county, one of two things would obtain. Either there would be a clean-up, or the meat bills would be smaller."

Dr. Long says that complaint came from the Keweenaw school regarding the drinking water furnished the school. Cases of fever were supposed to emanate from this source. The water supply was from a tank across the road from the school. The tank being filled about once a week supplied a family and the school. The tank not having been cleaned for some time, the water stood in the tank until an odor came from the water. The school was ordered not to use the water for drinking until the tank and pipes are cleaned.

Dr. Manson reported seven cases of typhoid fever in a family in Scandinavian Colony. No cause for the fever could be discovered about the residence. But an unkept hog-pen near the residence caused the patients great annoyance.

Clovis hotels were reported to be in need of a clean up. Examination showed it to be difficult without a sewer system for the town. Both promised to do their best.

Dr. Island reported eleven cases of typhoid fever at the county hospital for September.

**CONTRACT AWARD.**

Bids were opened by the supervisors for the work of enlarging and remodeling the pump and engine house in rear of the court house. The tenders were these:

**DRAWS OUT \$2100. ABANDONS FAMILY**

At the instance of the Fresno County Humane Society, a complaint was filed with Judge Graham, charging Thomas Jefferson Allen with having abandoned his wife, Mervia Allen. Mrs. Allen alleges that the husband had made considerable trades and accumulated \$2100, which he had in the First National Bank. He drew the whole of the money out, gave her \$100, told her she might shift for herself and departed for parts unknown. As the abandonment of a wife is a felony the court granted the warrant.

Two children were also abandoned and left destitute at the same time, save for the \$100 he left with his wife.

### Anty Drudge on Washing in a Flat.

*Mrs. Apartment*—"It's the hardest thing to get hot water here; you're not supposed to do any washing in the rooms. And when I do get hot water, it takes so long to wash that the rooms get awful smelly."

*Anty Drudge*—"Why don't you use Fels-Naptha? Then you won't have to use hot water. You will get through with your wash in a jiffy and there'll be no steam to make your rooms offensive."

To women who live in apartments the washing of clothes is a problem. The solution is Fels-Naptha soap.

No need of hot water; no boiler, no washboard. For light washing you don't even need a washtub, because the bathtub or basin will do quite well.

All you require is Fels-Naptha, cool or lukewarm water and a place to dry the clothes.

Say you have a shirtwaist or two, napkins, lingerie and other small things, that you don't have time or don't want to send out to be washed. You can do much better at home in this way:

Wet the clothes, soap well with Fels-Naptha, roll and leave to soak in cool or lukewarm water for a short time. Then rub lightly, rinse and hang up to dry.

Takes but one-fourth the time and one-tenth the work of the old way. Also saves the clothes.

Follow directions on the red and green wrapper.

### "KNIGHT FOR A DAY" TUNEFUL OFFERING AT BARTON TONIGHT

Grace Demar in "A Knight for a Day" at the Barton tonight.

"A Knight for a Day" that comes to the Barton tonight, is one of the most tuneful, frothy, clean and entertaining musical shows that has ever been conceived. It will be seen here for the second time. There has been nothing better here this season and for several seasons there will be nothing to surpass its novelty. It awakens an interest from the start by the handsome stage settings and fetching chorus upon each arrival of the principals the merriment increases. The company without exception, presenting this new musical fiasco is a clever one. Edward Hume, a comedian of rare ability, creates a laugh every minute he is on the stage in the part of Jonathan Jay. Mr. Hume is all that the name implies, and one critic remarked "when Hume can't get a laugh it is because he is performing in a morgue with a number of stiffs empty." Grace Demar as "Thillie Day" divides honors with Mr. Hume. She is a fearful and wonderful creation when it comes to provoking laughter, and when she acts the audience becomes boisterous. Miss Demar has accomplished one of the most unique and entertaining character creations that have been enjoyed for many seasons. Her peculiar dress style has set a pace that will be hard for other comic imitators to follow. The entire cast is far and away above the average talent provided for these up-to-date musical organizations. The singing beauty chorus is not only very pleasing to look upon, but is costumed in gorgeous raiment. One of the features of the program is the encores that have been provided for several of the musical numbers, particularly the finale to the first act to the popular hit "Life is a See-Saw," which is elaborate, expensive and effective. "America" and "Comedy" are words writ large all over "A Gentleman from Mississippi," the play which William H. Brady and Joseph R. Gilsner, will make known tomorrow night in the Barton, where it will be interpreted by a company of players selected in each individual case, for the especial fitness of the various roles. That this is one of the notable plays of the age may be gained from the fact that it ran all last season in New York City, for twenty-two weeks in Chicago, and that it outlasted every other play of the season in the former city although it was put forward with no other claim than that it was a comedy of American life and character. When it is said that it ran all season, it is not meant that it ran four months, or six months, or through a conspicuous part of the theatrical year, which is from September 1 to April 30. "A Gentleman from Mississippi" was on view continuously in New York from the time of its September production there, a week after

it was originally made known in Washington, D. C., until mid-June, when it was transferred from the Bijou Theater to the roof auditorium of the New Amsterdam theater, where it ran throughout the hot weather, being re-transferred to the Bijou for the resumption of the run.

It is the story of this comedy that the press, in its cleanest and most wholesome form, is the best aid our public men can have in their efforts to serve this great nation. A same lesson, surely, and one that must strike home to everybody who can lay claim to being an American.

### HUMAN CREDULITY KNOWS NO LIMIT

An English Spinster Writes About Shelbyville Lot.

Wants to Know Whether It Is Improved and Why She Gets No Rent.

The limit of human credulity is reached in a letter received yesterday by County Recorder Harstow. In this letter a woman resident in England asks concerning a resident lot that she bought in 1890, concerning which she says she knows nothing, and in which of course she has not paid taxes for over nineteen years, yet innocently asks whether it has built upon and why she has not been receiving rentals from her landed possessions.

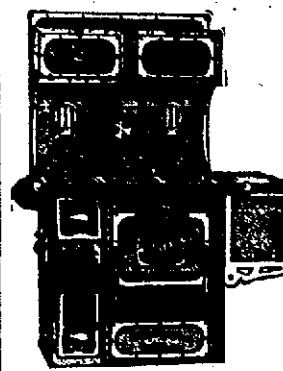

The correspondent is Georgiana Arnold of West Brighton, Sussex, England. She writes that she is "very much obliged" for "any information about the residence lot belonging to her which she purchased in May, 1890," as she has not received any rent from it or any information about it. She describes it as situated in the county of Fresno, state of California, as plotted by the California and Southern Land Trust Party, being residence lot No. 34, 25x100 feet, as shown by the warranty transfer title deed signed by Joseph Brewster as president and acknowledged before a notary in Hamilton county, Ohio, on May 7, 1890.

"I shall be grateful if you can kindly tell me if my land has been built on or anything about it," concludes the innocent writer in a postscript.

The residence lot of Miss Georgiana is in the mythical Shelbyville of which metropolis there is a beautiful map on record in the county archives. As delineated on that map, and this is all there is or ever was of Shelbyville in the West Side alkali belt, there is a paper city of 654 blocks of land and 27,700 25x100 lots, bounded by A and P streets and First to Fortieth avenues, with a park facing every school block reservation, a railroad bisecting the town and immense reservations for freight "spots."

It would be interesting to know how Miss Georgiana came by the title deed, for Shelbyville lots were given away at one time by an enterprising Western traveling show-man as a lottery prize to honor the sale of tickets of admission to his show, the prize winner paying for deed, notarial fee, etc.

# Does Fresno Want the Turkish Tobacco and Cigarette Factory?

## Everybody Boost and Get the Big Enterprise to Locate In This City

Buy stock and share in the profits of both the factory and plantation. 500 acres in Fresno County now being planted to Turkish tobacco. If the factory is located in this city it means employment to about 300 people as well as about 200 people on the plantation.

## IT'S A BIG THING FOR FRESNO—BOOST FOR IT!

Talk With the Chamber of Commerce or the Boosters' Club

# Opportunity No. 5

We refer with pride to our success in the Silver Tip, Coalinga Blue Moon, Coalinga Great Western, and Fifty-Seven Oil Companies. These were opportunities rarely offered to the investing public to secure real meritorious stocks in companies operating on absolutely proven ground.

The wonderful success of our properties and the unusual returns our clients

have received from small investments, is now common knowledge, and again, we are here to serve the investing public, with opportunities of unquestionable merit

Our proposition No. 5, the Coalinga Crystal Oil Co., is equally as good, and should meet instant and general approval. We unqualifiedly endorse the

# Coalinga Crystal Oil Company

as being a gilt edge investment proposition. There is no speculation about it--the territory is proven.

Mr. Z. L. Phelps, acknowledged to be the most successful producer in the Coalinga field, is president and general manager of the Coalinga Crystal Oil Co. He has the proud distinction of having drilled the famous Lucile wells, and the Silver Tip gusher, which latter came in with a production of 17,000 barrels per day.

Consult the map, and fix the location of this property on Section 12, adjoining the famous Section Six. No better oil territory in the state of California. It comprises 80 acres, owned by the company, with a capitalization of only 300,000 shares.

Work is under way on Well No. 1.

For a limited time we will sell 20,000 shares of the Coalinga Crystal Oil Co. stock at 25 cents a share.

## NEWS OF EVENTS IN REALM OF SPORT

## TIGERS AT MODESTO TODAY; VISALIA NEXT

Series With Bakersfield Drillers Also Contemplated—Captain McDonough To Keep Team Intact For Several Weeks

The "blow-up" of the California State League will not interfere with the scheduled exhibition game at Modesto today between the Fresno Tigers and the Modesto Reds. Captain McDonough and his men will leave this morning for the northern town and return at 10 p.m. tonight. The Reds will present their regular lineup, with either Bill Cates or Phil Mobley on the mound. Oscar Jones will probably work for the Tigers, although the Modesto fans are anxious to see Artie Smith serve up the breaders from the mound. McDonough will coach with Schmitt on short, owing to the absence of Buck Francis. Kuhn will coach in left garden. The remainder of the lineup will be the same as during the State League series.

It is expected that one of the largest crowds of the season will witness the contest, inasmuch as many out of town visitors will be in Modesto to greet President Taft this afternoon. Many will remain to see the game. Modesto is known as a hot ball town and judging from the good showing the Reds have made against Oakland and Sacramento, both of whom were beaten, the Tigers will be given a run for the bacon.

In line with today's exhibition, Captain McDonough stated last night that he will take his men to Visalia for two games on Saturday and Sunday, October 15-17, respectively. On the following Saturday and Sunday, or October 23-24, it is likely that Bakersfield will be invaded. Newman has disbanded, as a series of games might be pulled off there. The purpose of the "blow-up" of the State League is to keep the team intact in order that the local fans may witness some good ball about November 1. About this time the Pacific Coast League season will have been concluded and any of the six clubs at liberty to hook up with the State League. It is understood that the Oakland outfit, which has the Oakland outfit, and the Oakland outfit, which has the Oakland outfit, will accompany McDonough.

## Doc Moskiman Premier Heaver of State League

Jones Hurls More Games Than Medico and Ranks Third on List.

Following are the official averages of the State League pitchers for the second half of the season. These averages were compiled in the sporting department of the Republican and include every man who occupied the mound, if for one or a part of a game. The final dope:

Player	Club	W.	L.	P.	ERA
Couper, Stockton	Stockton	10	1	1.000	1.000
Stockman, Oakland	Oakland	10	1	1.000	1.000
Strickland, Sacramento	Sacramento	9	5	1.000	1.000

## BELMONT RESULTS

**BELMONT PARK, N. Y., Oct. 5.**—An ordinary card was run off here today. The crowd was up to the average. The Corinthian cup steeplechase field was reduced to two starters and Vahlhaug was returned the winner by ten lengths. Results:

First race, one mile—Tison, 8 to 1; won. Adrieche, 5 to 1; second; Miss Alert, 7 to 1; third. Time, 1:39.

Second race, steeplechase, about two miles and a half—Vahlhaug, 8 to 1; won. Pretty Michael, 3 to 1; second. Time, 5:41 3-5.

Third race, seven furlongs, handicap—Question Mark, 5 to 2; won. Hurri-gan, 3 to 1; second; Arondack, 7 to 1; third. Time, 1:25 2-5.

Fourth race, six furlongs—Primer Imperial, 1 to 4; won. Anthropol, 2 to 1; second. Time, 1:41 2-5.

Fifth race, mile and a quarter—The Peer, 5 to 1; won. Monette, 1 to 1; second; Parodie Queen, 12 to 1; third. Time, 2:04 4-5.

Sixth race, five furlongs—Agner, 11 to 5; won. Calypso, 8 to 5; second; Flying Footstep, 6 to 1; third. Time, 1:00 1-5.

## SHORTSTOP DOOLIN UNDER SUSPENSION

NEW YORK, Oct. 5.—President John Heydler of the National League today suspended Shortstop Doolin of Philadelphia for the rest of the season and fined him \$50, following yesterday's game which was forfeited by Philadelphia to New York. Heydler took the ground that Doolin was mainly responsible for the incident.

Otto Knebe, the Philadelphia second baseman, and Lew Moren, the Philadelphia pitcher, were fined \$25 each.

## MEN WHO FIGURED PROMINENTLY IN CUB-PIRATES SERIES—SCENE IN GAME

The Pittsburgh club has been officially declared the winner of the 1938 National League pennant and interest in the race has lessened considerably. Therefore the trend of conversation among the fans throughout the country turns to the world's series to start next Saturday at Pittsburgh. The new Forbes Park will be the scene of the opening struggle between the Pirates and Detroit Tigers, and fully 50,000 bugs are expected to wend their way through the turnstiles.

But now that the grueling race for the flag is over, thousands of fans will look back to the memorial fight put up by Frank Chance's Cubs from Portkown. Although beaten, many still hold the opinion that had Chicago enjoyed any luck at all the final result would have been different, with a fourth consecutive pennant flying from Chance's belt. Nearly every fan in Fresno pulled hard for the Cubs to win just because a Fresno boy was leader of what they considered the greatest baseball machine in the universe. However, an important cog in the infield slipped in mid-summer and luck seemed to break against the champions. At that, Chance's men put up a gallant fight to the last ditch. Whenever the Cubs and Pirates met during the season it was a signal for a hotly contested struggle. The rivalry was intense.

Chance claimed that his hired men were superior to the pennant winners and only hard luck robbed them of the banner and the achievement of breaking a world's record for consecutive pennants.

Pittsburgh has played good, consistent ball all season. The Pirates after a rather bad start went into the lead on May 6th, passing Chicago, and have never been headed since. Chicago pressed Clark's crew pretty closely early in September, only five games separating the leaders at that time. Then by winning three out of four games from the Cubs on their last western trip the New Yorks practically put Chicago out of the pennant race. George Gibson has made a wonderfully good record behind the bat this season, having caught in nearly all the Pirates' games played. His throwing to the bases has been excellent, and his batting has been an important feature in giving the pennant to Pittsburgh. Pitcher Vic Willis has materially aided the Pirates with his good work in the box. Pfeister, the Cubs' star left hand twirler, has been very effective against the Pittsburgh team all season.

The illustration shows a close play at home plate in a recent Chicago-Philadelphia game. As a windup to the present season the Pirates will play two games with Cincinnati, October 5-7.

## Tennant's Home Run In 13th Breaks Series At Fever Heat

Seals Take First Struggle from Angels; No Game at Portland.

**LOS ANGELES, Oct. 5.**—With as timely a hit as ever happened, Tennant won the thirteen-inning game for San Francisco, the game being 5 to 0 to the home team. The hit came in the 13th inning, when Tennant hit a home run off the pitcher, Seals. The hit came in the 13th inning, when Tennant hit a home run off the pitcher, Seals. ## THREE ORGANIZED BALL LEAGUES IN CALIFORNIA

One Class A, One Class B and the Third, Class C—Bakersfield Is Behind Latter Movement For Next Season

(Special to the Republican.)  
**BAKERSFIELD, Oct. 5.**—The Bakersfield Baseball Association has been organized with Fred Gustier, president; Harry G. Stuart, vice president; H. T. Kates, secretary; Mrs. National Bank, treasurer, and Joe P. Carroll, manager. Other members of the directorate are E. P. Sanders, Lyman Lowell, Harry A. Jastro, Philip A. Klipstein and Spot Macfarland. The association has assumed charge of the Drillers and next year it plans to be foremost in promoting a San Joaquin valley league, rating as a Class C league. Baseball is now on a stable basis here and while the season is

practically over the association is planning itself in shape to start off the season of 1939 with a crack team. To form a league it is proposed to include Visalia, Modesto, possibly Newman, Hanford or Tulare. The league may embrace six teams. Week end games will be played and each team will be compelled to put up a guarantee to finish the schedule. All interest in Bakersfield now centers on the Visalia games Saturday and Sunday. The fans are picking the Drillers to win two out of three games while the visitors figure Visalia has an even break. The Drillers' lineup will be materially strengthened for the games.

## BALL PLAYER HIT IN EYE BY SHOT

Visalia's Left Fielder Suffers Painful Injury While Hunting Ducks With Fellow Tossers.

(Special to the Republican.)  
**VISALIA, Oct. 5.**—Jack Swanton, left fielder for the Visalia Pirates, was yesterday slightly wounded while duck hunting by being struck in the left eye by a stray shot.

Swanton was hunting with Maize, Feeney, Garibaldi and several other members of the team at the lake. Maize fired at a duck, being at a distance of some hundred yards from Swanton. A single shot found lodgment in the latter's eye and the impact was sufficient nearly to knock him over. This morning the eye was inflamed, but it is thought there will be no serious consequences. Local sportsmen have found hunting excellent at the lake and the limit of ducks has been secured in several instances. The first football game of the season will be played on the local grounds Saturday afternoon, when the Lindsay high school eleven will be here for a practice game.

**NO GAME AT PORTLAND.**

**PORTLAND, Oct. 5.**—Portland-Sacramento game postponed on account of rain.

## We Will Save Your Teeth

It is our mission, like that of all reliable dentists, to save and preserve teeth whenever possible. To this end we employ both the filling and crowning processes in all cases where the tooth is not too badly decayed. It is only in extreme cases that extraction is resorted to. By the superior character of our work, when we have finished either filling or crowning the patient will in point of durability and wear have teeth even better than the natural ones. While, as just stated, it is our mission to save teeth, yet we give each individual responsibility for tooth preservation. While we point out the dangers of delay in consulting us for the correction of tooth trouble, it is your fault and you are entirely responsible if you delay coming until it is too late for our services to be effective in saving your teeth. For this reason we urge you to come to us and have your teeth examined. It will cost you nothing for such examination and it may mean a saving to you of a tooth or teeth, the loss of which might ultimately make it necessary to use artificial ones.

### OURS IS PAINLESS DENTISTRY IN ITS TRUEST SENSE

Delay in visiting a dentist for needed work is often due to the fear or dread of the pain that will have to be endured. On this point we beg to give our positive assurance that we employ methods that really eliminate pain, and any work whether filling, crowning, the insertion of bridge work or tooth extraction is executed without any pain whatever being experienced. In consequence our patients feel a degree of comfort while having work executed that was utterly impossible under old time methods.

Remember that we are experts in all lines of dental work and employ many methods of advanced dentistry not used so far as we are aware, by others in this field. Charges always reasonable.
